Work Experience

01/24 - Present **Corporate Systems Engineer**
Palo Alto Networks (Palo, TX)

- Leading demos, Proof of Concept (PoC) projects, workshops, security lifecycle reviews, and best practice assessments of our best-in-class cybersecurity platform for prospective customers and partners
- Applying mastery of cloud infrastructures and network/network security to identify and implement best firewall, endpoint, and cloud solutions for customers
- Planning and building compelling technical and business-focused cybersecurity solutions which drive adoption and growth after the initial sale and across the portfolio

08/22 - 12/23 **Supply Chain Business Analyst | Sales and Marketing Project Manager**
Solidigm (Folsom, CA)

- Led revenue-driving efforts by coordinating operations such as inventory tracking and product planning across global business units to ensure allocations for customers
- Analyzed large data sets of customer and market signals to forecast a 6-qtr supply/demand horizon and presented key findings to internal stakeholders to influence supply/demand decisions
- Planned and implemented department and external trainings, onboarding, conferences, recognitions, budgets, and communications including SharePoint, newsletter, and org announcements
- Created customer-facing presentations and dashboards to track key metrics for CRO and global executives

05/22 - Present **Project Manager Mentor | Career Coach**
Avocademy (Remote)

- Managing teams of 4-5 UI/UX designers working consistently with developers and stakeholders to create customized user experiences, including personas, user flows, wireframes, style guides, and high-fidelity screens
- Supporting design teams and ensuring clients receive consistent communication regarding deliverables
- Providing career coaching including resume review and interview preparation, offered to 300+ UI/UX students

08/21 - 08/22 **Associate Systems Engineer**
Palo Alto Networks (Palo, TX)

- Certifications: PCCET, PCNSA, PSE Strata Professional, PSE SASE Professional

- Maintained technical leadership of networking technologies and Strata next-generation firewall, and familiarity with Prisma and Cortex, to effectively differentiate our cybersecurity solutions against competitors'
- Collaborated with Account Manager to establish trusted relationships with Commercial SEs, customers and partners by leading demos, PoCs, BPAs and UTDs, and providing additional support as needed

**05/19 - 12/20 Software Engineering Intern
Intel Corporation (Folsom, CA)**

- Owned Post-Si platform and graphics component, responsible for launch of 10 platforms and operating systems
- Rotated between DevOps roles of Monitoring, Upgrades, and User Support following Software Development Life Cycle, and regularly communicated the status of Pre-Si and Post-Si farms to PMs
- Developed Python automation scripts to optimize the day-to-day regression analysis workloads of CI contractors
- Trained new hires and facilitated the transition between frameworks for teams in other geographical locations

**04/18 - 08/19 Lead Instructor | Marketing Lead
Mathnasium (Folsom, CA)**

- Delivered 1-on-1, standards-based mathematical instruction to students from preschool through college
- Assisted Center Director with sales and administrative tasks required to run the center while providing leadership on the instructional floor to 30+ students at a time
- Demonstrated mastery of Mathnasium programs and policies, maintained enrollment of existing and new families
- Managed the marketing and social media for 8 Mathnasium centers in the greater Sacramento region
